

Informationsheet for prospective international students

About Denmark

Denmark - home of the happiest people in the world!

Denmark is a Nordic country in Northern Europe, located southwest of Sweden and south of Norway, and bordered to the south by Germany. The Kingdom of Denmark comprises Denmark and two autonomous constituent countries in the North Atlantic Ocean, the Faroe Islands and Greenland. Denmark proper has an area of 43,094 square kilometres, and a population of around 5.64 million inhabitants. The Scandinavian nation, Denmark shares strong cultural and historic ties with its overseas neighbors Sweden and Norway. The national language, Danish, is very closely related and mutually intelligible with Swedish and Norwegian.

Danes enjoy a high standard of living and the country ranks highly in numerous comparisons of national performance, including education, health care, protection of civil liberties, government transparency, democratic governance, prosperity and human development. Denmark is frequently ranked as the happiest country in the world in cross-national studies of happiness. The country ranks as having the world's highest social mobility, a high level of income equality, has one of the world's highest per capita incomes, and has one of the world's highest personal income tax rates. A large majority of Danes are members of the National Church, though the Constitution guarantees freedom of religion.

About DTU

DTU – Technical University of Denmark

For almost two centuries DTU, Technical University of Denmark, has been dedicated to fulfilling the vision of H.C. Ørsted – the father of electromagnetism – who founded the university in 1829 to develop and create value using the natural sciences and the technical sciences to benefit society.

Today, DTU is ranked as one of the foremost technical universities in Europe, continues to set new records in the number of publications, and persistently increase and develop our partnerships with industry, and assignments accomplished by DTU's public sector consultancy.

The international dimension is of vital importance to DTU. In 2013, we welcomed 474 international students into our MSc programmes, half of our PhD students are recruited from abroad, and more than one third of our scientific staff are highly qualified researchers of international backgrounds. In addition, the extent and intensity of our collaborations with other leading technical universities around the world continue to grow.
