Neubauer American Study Abroad Programs & Internships

Prepare to excel in your future academic and professional career

Students study with Israeli peers and live on Technion’s modern campus. The program offers Israel discovery tours, visits to start-ups, and encounters with entrepreneurs. Students are offered professional internship opportunities where they can gain valuable research training and real-life experience.
Engineering & Science - Spring Semester
Academic courses are offered during the spring semester in a variety of science and engineering disciplines and can be taken as part of the engineering academic track. Courses include: core science and engineering, Civil and Environmental Engineering, Chemical Engineering, Mechanical Engineering, Materials Engineering, Biomedical Engineering, Mathematics and Aerospace Engineering.

Architecture & Industrial Design - Spring Semester
Spring semester academic courses in the Faculty of Architecture's Industrial Design track are offered for senior undergraduate students from all over the world.

Entrepreneurship - Spring Semester & Summer Program
Academic courses offered during the spring and summer are tailored to high-tech minded students interested in exploring the Israeli entrepreneurial ecosystem and pursuing a career in a start-up or other entrepreneurial environment. Courses include: Social Ventures, Managerial Negotiation, selected topics in Economics, Organizations and Entrepreneurship and an entrepreneurial project (in which students transform an idea into a business plan / start-up).

Professional Internship - Spring Semester & Summer Program
In addition to spring and summer academic courses, students may take part in a professional internship at a high-tech company / start-up, or choose a research internship with Technion faculty working on real-life scientific challenges.
