

ENTREPRENEURSHIP

Summer in Entrepreneurship with Professional Internship

Study at one of the world's leading institutes
for Innovation in Science & Technology

TECHNION
CREDITS
AWARDED

Our programs prepare students to excel in their future academic and professional careers. Students study in classes taught in **English** with Israeli peers and live on Technion's modern campus. As part of their extracurricular activities, students take trips around Israel, visit start-up companies and meet entrepreneurs, and are offered professional internship opportunities where they can gain research and real-life experience.

Upon successful completion of their chosen course(s) and/or internship, students will be awarded a commensurate number of Technion credits.

Summer in Entrepreneurship with Professional Internship

The program is tailored to high-tech minded students interested in exploring the Israeli entrepreneurial ecosystem in the Start-Up Nation and pursuing a career in a start-up or an entrepreneurial environment. Academic courses will include introduction to Entrepreneurship and the Entrepreneurial Ecosystem, Entrepreneurial Economics, and Finance, with projects to assist students to develop an idea into a business plan or start-up and more.

Professional Internship

Professional Internships are directed work-study experiences taken in companies and industry sectors common to the Israeli economy. Working as an intern enables students in sophomore year or above to connect theory with practice and apply the engineering and/or scientific principles learned in the classroom to a real-world professional environment. Completing an internship abroad is an invaluable opportunity to learn about local business and engineering practices and customs, hone personal and professional skills and habits, and broaden perspectives. Internships are unpaid positions taken over a period of at least 10 weeks (minimum 200 hours) and require students to have a GPA of 3.0 or higher.
